Course description

This course explains platform use and describes its software components, presenting a complete picture of system features, operation, and capabilities. A large part of the course is dedicated to hands-on exercises for attendees to gain practical experience with the platform and prepare to operate it live.

Audience

The training is designed for:

- Platform operators and administrators
- Support and maintenance engineers who need an operational understanding of the platform
Learning objectives

Upon successful completion of this course, you should be able to:

• Understand the product concepts, topology, and architecture
• Start and stop the platform
• Check the platform to ensure it’s correctly started or stopped
• Operate, monitor, and administrate the platform
• Undertake a primary troubleshooting diagnostic

Overview

Mandatory course prerequisites

• Must have attended to HPE OCMP operations and administration training
• Good knowledge of Linux Red Hat administration tasks
• Good knowledge of English—if necessary, translation services can be hired for an additional fee.

Course materials and methodology

At the beginning of the course, you will receive a PDF copy of all PowerPoint slides. One set of user documentation will be available for use during the course. Lectures are interspersed with hands-on exercises, with about half of the course dedicated to practical sessions focused on platform operations.

Course location

This course is delivered at an HPE site with HPE-supplied facilities and equipment. It may be delivered on demand at the client’s premises, in which case the client is responsible for training room setup, including video projector, white/paper board, and one platform test bed. In either case, attendees must bring their own laptops.

Trainer’s profile

Training will be led by a senior HPE consultant with expertise in platform operations.

Audience size

Training requires a minimum of two students and a maximum of eight.

Training schedule

• This course is offered on demand.
• A six- to eight-week lead time is required to schedule the training session.
