

HPE USP-M Operations and Administration training

HPE CMS Education Center

Course overview

- Delivery: Instructor-led
- Date: On request
- Length: Three days
- Location: HPE premises (preferred) or your location
- Level: Intermediate
- Delivery language: English

Course description

This course explains platform use and describes its software components, presenting a complete picture of system features, operation, and capabilities. A large part of the course is dedicated to hands-on exercises for attendees to gain practical experience with the platform and prepare to operate it live.

Audience

The training is designed for:

- Platform operators and administrators
- Support and maintenance engineers who need an operational understanding of the platform

Learning objectives

Upon successful completion of this course, you should be able to:

- Understand the product concepts, topology, and architecture
- Start and stop the platform
- Check the platform to ensure it's correctly started or stopped
- Operate, monitor, and administrate the platform
- Undertake a primary troubleshooting diagnostic

Training agenda

Day 1

- Introduction
- Description and architecture
- Sigtran protocol overview
- System, platform, and network configuration
- Platform start and stop

Day 2

- IPSTG overview (when needed)
- Network configuration
- Level 3 concept and configuration commands (MTP 3 or/and M3UA)
- SCCP, TCAP, ISUP configuration

Day 3

- Monitor the platform and the applications
- Administrate the platform
- Troubleshooting tools overview

Overview

Mandatory course prerequisites

- Good knowledge of Linux RedHat administration tasks
- Knowledge of telecom signaling protocols (SS7 and Sigtran M3UA)
- Good knowledge of English, as the course is delivered in English. If necessary, translation services can be hired for an additional fee.

Course materials and methodology

At the beginning of the course, you will receive a PDF copy of all PowerPoint slides. One set of user documentation will be available for use during the course. Lectures are interspersed with hands-on exercises, with about half of the course dedicated to practical sessions focused on platform operations.

Course location

This course is delivered at an HPE site with HPE-supplied facilities and equipment. It may be delivered on demand at the client's premises, in which case the client is responsible for training room setup, including video projector, white/paper board, and one platform test bed. In either case, attendees must bring their own laptops.

Trainer's profile

Training will be led by a senior HPE consultant with expertise in platform operations.

Audience size

Training requires a minimum of two students and a maximum of eight.

Training schedule

- This course is offered on demand.
- A six- to eight-week lead time is required to schedule the training session.
