

Migrate smoothly and effectively

HPE Migration Service for Exchange

Seamless

Minimize disruptions to operations with a smooth and transparent migration process that offloads complexities, keeps you informed, remediates issues, and mitigates risks

Flexible

Benefit from the flexibility of migrating from legacy versions of Microsoft Exchange or from heterogeneous, third-party messaging services to an on-premises, cloud, or hybrid Microsoft Exchange solution

Cost-effective

Restructure from capital expenditures (CAPEX) to operating expenses (OPEX) by moving to a software as a service (SaaS) delivery model of your messaging system

Productive

Allow IT operations to focus on end-user and business support, not on maintaining the legacy infrastructure

HPE: Recognized expertise with Microsoft

With 30+ years of joint investments and innovation to help you succeed, the HPE and Microsoft global strategic alliance is one of the longest-standing business relationships of its kind in the industry. HPE is among the largest Office 365 consumers, and we have specialized forces of consultants and support professionals for Microsoft environments worldwide, including:

- 34,000+ Microsoft-trained professionals
- 13,000+ Microsoft-certified professionals
- 12 Microsoft MVPs
- 19 million+ Exchange seats implemented
- 6.5 million HPE-managed mailboxes
- Microsoft Office 365 and Skype for Business deployed to 345,000 employees and contractors
- Microsoft Gold Partner in Cloud Platform, Cloud Productivity, Messaging, Collaboration, and Customer Relationship Management competencies

Ready to move to the latest version of Microsoft® Exchange on-premises or a Microsoft Office 365 hybrid solution? HPE offers ideal routes to upgrading and migration—using a proven methodology to ease complex transitions without disrupting your business.

Making the move

Microsoft Exchange is currently the most commonly used messaging platform in the market; those organizations who don't already have it are thinking of moving to it. Some of them are using other platforms such as IBM Notes/Domino, GroupWise, or Gmail, and are considering moving their email messaging workload to Microsoft Exchange Server or to its cloud variation. Those looking to consolidate their current messaging environments want to reduce costs associated with licensing and operations, while preserving information security and data privacy. Furthermore, they want to enable mobile workers to use their email messaging systems without having to invest in extra network infrastructure.

Ensure a seamless transition

HPE Migration Service for Exchange simplifies and streamlines the transition of your mailboxes and messaging data from legacy systems to a consolidated on-premises, cloud, or hybrid platform. We use a proven methodology, the HPE Migration Framework, and best-of-breed tools from third-party technology partners to assess, analyze, and migrate your data. We also help to ensure that the transition between your source systems and the Exchange platform is as seamless as possible.

Hewlett Packard Enterprise has long-term experience with the most complex implementations of Microsoft Exchange since its first version. In addition, we've helped many customers transition between product versions as well as move from other messaging platforms.

Take advantage of important benefits

- **Mitigate risks and minimize disruptions:** With HPE Migration Service for Exchange, we plan and test critical aspects of the upgrade or migration to address any issues while ensuring a smooth, flexible transition to your target messaging solution.
- **Benefit from a streamlined architecture:** Moving to the latest Microsoft Exchange platform gives you a proven on-premises and cloud-ready architecture, combined with information-protection capabilities.
- **Move from CAPEX to OPEX, enhance productivity:** Restructure your expenses from CAPEX to OPEX and free your IT operations staff to focus on end-user support instead of maintaining the legacy infrastructure.

Solution brief

Proven migration experience

We migrated 20,000 mailboxes from an HPE-supported Exchange messaging services to a Microsoft-hosted Office 365 environment for a global engineering company. In addition, we migrated IBM (Lotus) Notes to Exchange for a multinational bank with a global network of 270,000+ users in 6,200 offices and 65 countries.

Click [here](#) to read about how we migrated our own global, on-premises based Microsoft email and collaboration workloads to Microsoft Office 365, reducing costs and increasing workplace productivity.

Take advantage of the HPE Readiness Workshop for Office 365

The HPE Readiness Workshop for Office 365 is an excellent way to help you develop a high-level approach to dealing with complex technology transitions. The goal of this one-day workshop is to evaluate many factors and determine a suitable approach to implement Office 365 successfully, using a highly interactive, slide-free format that HPE consultants facilitate.

Enjoy a smooth migration process

A comprehensive assessment is one of the keys to success. We discover, assess, and analyze your current messaging environment—proposing the best strategy for migration to the appropriate on-premises, cloud, or hybrid Exchange solution. We capture and analyze all of the necessary information about your messaging system, data, and dependencies on other systems and business processes. As a result, we can design and execute a better managed and controlled migration process.

Plan and manage appropriately

Proper planning is the most important part of the migration project. HPE helps you plan and manage the overall transition process, providing you with a migration design that reflects technology and business processes dependencies. We leverage our experience acquired during more than two decades of delivering Exchange migration and upgrade projects—in addition to the tool set that our consultants developed. We also incorporate Microsoft's FastTrack service when appropriate.

Stay informed throughout the entire process

While mailbox migration can be delivered using industry-standard tools, transitioning to a new messaging environment is not only about the move. Email is a critical service for most end users, who need to be informed of any change as well as trained to use the new

tools effectively. HPE communicates with you throughout the entire transition process to help ensure the best end-user experience. We provide a supplemental Management of Change (MoC) service to help you quickly adopt the new Exchange messaging system.

Prepare to migrate

If you decide to move to Office 365 and migrating to Exchange is your first step, contact your HPE representative to ask how the HPE Readiness Workshop for Office 365 can help you make the move and prepare for transformation. If you're thinking of migrating or upgrading your current messaging system to the latest version of Exchange or the Office 365 hybrid solution, contact your HPE representative to ask how HPE Migration Service for Exchange can help you make the transition smoothly and effectively.
