

HPE and SaltStack

HPE OneView & SaltStack Enterprise

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and SaltStack are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, SaltStack is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

SaltStack has access to the right tools, processes and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

SaltStack Enterprise: SaltStack Enterprise and HPE OneView are integrated to provide full control of a heterogeneous data center environment whether it is built on HPE Synergy, ProLiant, or BladeSystem c7000 Composable Infrastructure. The integration allows enterprise IT organizations to efficiently manage every aspect of a data center infrastructure through modern, software-defined automation with smart provisioning and event-driven management.

HPE OneView: HPE Composable Infrastructure enables organizations to drive new business opportunities that increase revenue and deliver products, services, and experiences to the end users quickly and efficiently. It's a single infrastructure that reduces operational complexity for traditional workloads and increases operational velocity for the new breed of applications and services. HPE Synergy powered by HPE OneView is the first platform architected from ground up for Composable Infrastructure and delivers performance, flexibility, and manageability allowing businesses to reduce cost, and provision and scale resources efficiently at cloud like speed. HPE OneView, your infrastructure automation engine, is built with software-defined intelligence, a template-based approach to management that lets users deploy infrastructure faster and simplify lifecycle operations across compute, storage, and fabric resources. The Unified API in HPE OneView accelerates application and service delivery instantly,

increases productivity and control across the data center using a single line of code to compose infrastructure fast. This enables IT to maximize the speed, agility, and efficiency of delivering applications and services to meet their business SLAs.

Company overview

About SaltStack

SaltStack intelligent orchestration helps enterprise IT organizations more efficiently secure and manage all aspects of the software-defined data center. SaltStack is unique in providing event-driven automation for the scalable and efficient configuration and control of compute, storage, and network complexity. SaltStack software specializes in addressing ubiquitous, evolving infrastructure and software environments including support for any cloud, virtualization, OS, container, system, or connected device.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is an industry leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
