5 REASONS WHY YOU SHOULD CHOOSE HPE FOR YOUR MICROSOFT AZURE STACK HUB SOLUTION

HPE ProLiant for Microsoft Azure Stack Hub is the best way to go

HPE ProLiant for Microsoft Azure Stack Hub simplifies the development and management of your hybrid cloud. It is co-engineered by HPE and Microsoft—based on a longstanding partnership—the joint solution enables you to run Azure-consistent services in your own data center.

Here are five reasons why you should choose HPE ProLiant for Microsoft Azure Stack Hub:

1. The most configurable solution available

HPE ProLiant for Microsoft Azure Stack Hub offers greater choice and more configuration options than other solutions. As a fully customizable solution, you can choose:

- The processor type that’s right for the workload
- Right-fit memory capacity
- Right-fit power supplies and rack options

With flexible configuration options, be assured that HPE ProLiant for Microsoft Azure Stack Hub will be the best fit for your existing environment.

2. Maximized performance

HPE ProLiant for Microsoft Azure Stack Hub provides higher storage capacity with support for up to 120 TB of raw capacity per node—delivering a 50% overall increase in capacity enabling you to turn workload at a faster rate. The higher workload performance and memory bandwidth of 48GB/s in memory bandwidth and double the memory capacity.

3. Unmatched security

Security on HPE ProLiant for Microsoft Azure Stack Hub is checked and guaranteed on three levels:

- **Detect**—with Runtime Firmware Verification to verify the validity and integrity of main system firmware. Defects in any compromised code or malware will result in notification to the administrators and notification is sent directly to you.
- **Protect**—via HPE Silicon Root of Trust, a designated silicon to ensure servers are anchored directly into the secure silicon. The firmware is generated through cryptographic best practices with the servers protected to ensure an attack on the source of any compromised code has been detected.
- **Recover**—with Secure Recovery, enabling you to recover firmware to factory state. If you prefer, you can choose to not recover the server at all and take it offline when the compromised code has been detected.

4. Pay-as-you-consume pricing

Reduce costs by leveraging a consumption-based payment model. HPE GreenLake gives you the cloud market rate:

- Rapid scalability
- Variable costs aligned to normal usage
- No up-front expense
- Enterprise-grade support
- One monthly bill

5. Expertise and try before you buy

Leverage the collective expertise of over 4000 HPE and Microsoft hybrids cloud experts. Have your questions answered and get the support you need:

- Deep professional services to test your own case design and implementation needs
- Best help you develop the best hybrid cloud strategy for your company
- Proven professional services to meet your specific needs

HPE ProLiant for Microsoft Azure Stack Hub delivers your hybrid cloud, your way—today. Only HPE provides deep hybrid cloud expertise, pay-as-you-consume pricing, and the most configurable solution available to meet your specific needs.
