

HPE and Litmus Automation

HPE Edgeline & Litmus Automation LoopEdge

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and Litmus Automation are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Litmus Automation is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Litmus Automation has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

PRODUCT OVERVIEWS

Litmus Automation LoopEdge: LoopEdge software can be installed on HPE Edgeline Converged Edge Systems, EL4000 and EL1000 or HPE IoT gateways, GL20 and GL10 to connect, process, and manage data and legacy devices.

More than 35 protocol drivers are included, to collect data from any type of PLC, DCS system, controller, or industrial system, giving companies a way to access and exploit the wealth of data in their environment. Once the data is collected into

Product brochure

the gateway, applications in the LoopEdge marketplace can be installed and run locally for complex event processing, local data storage, machine learning, data filtering, and data enrichment. By pre-processing, filtering, and analyzing data at the edge, companies save on costs by only sending useful, synthesized data to the cloud. LoopEdge works with the Loop industrial-grade IoT platform for remote device management and more. With LoopEdge, Litmus Automation bridges the gap for the Industrial Internet of Things (IIoT). HPE Edgeline: HPE Edgeline Converged Edge Systems enable true edge computing. In a single enclosure, they provide unprecedented high-performance compute, precision data capture and control systems, data center-class security, and Integrated Lights Out (iLO) systems management. These industrial-grade network edge devices are hardened for Internet of Things (IoT) edge environments and can operate in virtually any environment to deliver secure, uninterrupted connectivity. Upgradability and I/O options provide a strong foundation for your future IoT plans, enabling you to expand your IoT infrastructure beyond the confines of traditional data center and avoid

vendor lock-in. Edgeline Converged Edge Systems:

- Provides legacy manufacturing integration for predictive maintenance
- Delivers real time analysis and condition monitoring
- Allows real time monitoring and control
- Expedites Data management and video analytics
- Helps in asset monitoring and management
- Enables the Intelligent edge workspace

COMPANY OVERVIEW

About Litmus Automation

Litmus Automation bridges the gap between data in the field or factory and business applications for companies looking to implement IIoT solutions. Litmus Automation's offerings, LoopEdge and Loop, work seamlessly together to allow companies to access and exploit data previously trapped inside enterprise hardware, irrespective of where or when it was deployed. Working with original equipment manufacturers and other industrial companies, Litmus Automation's

proven IIoT solutions offer data and device management so companies can optimize both how they run their business and how their customers' businesses operate. The team brings hardcore industrial expertise, a modern development approach, a nimble business model, and a proven IIoT solution for all their engagements. Litmus Automation customers include Nissan, Renault, and Kyra Solutions, while partners like Hewlett Packard Enterprise expand the company's path to market.
