

HPE AND HARPA ITALIA

HPE OneView & Harpa Italia McubolCT

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and Harpa Italia are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Harpa Italia is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Harpa Italia has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

PRODUCT OVERVIEWS

Harpa Italia McubolCT: McubolCT is an advanced monitoring system with many enhanced features, such as:

- Simple and unified monitoring solution to have a proactive control of the whole ICT infrastructure and core business process, no matter of its dimension
- Accurate functional monitoring for critical ICT services & applications
- Georeferenced maps and ad-hoc synoptic views for monitored infrastructure
- Deep data collection & mining, for trend analysis and predictive management

Harpa Italia developed a seamless integration between McubolCT and HPE OneView to monitor hardware status of all HPE systems. In a typical heterogeneous ICT Data center scenario, it is possible to use them as one integrated system to:

- Provision, control, and manage HPE systems with HPE OneView

- Monitor all the Data center components (HPE & other vendors) in a single dashboard

HPE OneView: HPE Composable Infrastructure enables organizations to drive new business opportunities that increase revenue and deliver products, services, and experiences to the end users quickly and efficiently. It is a single infrastructure that reduces operational complexity for traditional workloads and increases operational velocity for the new breed of applications and services. HPE OneView, your infrastructure automation engine is built with software-defined intelligence, a template-based approach to management that lets users deploy infrastructure faster and simplify lifecycle operations across compute, storage, and fabric resources. The Unified API in HPE OneView accelerates application and service delivery instantly, increases productivity and control across the data center using a single line of code to compose infrastructure fast. This enables IT to maximize the speed, agility, and efficiency of delivering applications and services to meet their business SLAs.

COMPANY OVERVIEW

About Harpa Italia

The aim of the company is to design, develop, and manage advanced ICT infrastructure & solutions by integrating advanced HPE technology. Harpa Italia is certified UNI EN ISO 9001:2008 for software production and HW & SW sales. Founded in 1985, provides ICT and energy management solutions for Italian & EMEA market.

About Hewlett Packard Enterprise
