When you’re running a small to midsize business, you’ve got to make the most of everything. Whether that means working through lunch or printing on both sides of the paper, you do what it takes to save time and money so you can plow both back into the business. If you haven’t virtualized yet, you’re leaving both on the table.

Virtualization lets you allocate resources to applications as needed, so you can run multiple applications on a single server—like accounting, productivity, and payroll apps. That means you can run more applications on the servers you have—helping you do more with less while still managing the increasing number of workloads you rely on to run your business.

More capacity—less complexity

Keep the business running
Minimize downtime with the ability to failover between virtual machines.

Increase IT efficiency
Consolidation enables you to run more workloads on a single server.

Do more with less
HPE Small Business Solutions for Virtualization

Overcome resource constraints by consolidating workloads onto a single server.

Secure, simple, and affordable
HPE Small Business Solutions for Virtualization help you maximize performance and efficiently scale computing capacity while optimizing investments in hardware, software, and maintenance. They are built on HPE ProLiant servers, powered by Intel® Xeon® processors, and optimized and validated to run ClearOS™, ClearVM™, Microsoft® Windows Server® with Microsoft Hyper-V®, or VMware vSphere®.
HPE Small Business Solutions have been validated and optimized for each workload use case.

Better together

HPE Small Business Solutions for Virtualization are:

• **Secure**—Protect against attacks and quickly recover from unplanned downtime with built-in security features that make HPE ProLiant Gen10 the world’s most secure industry standard servers. ClearOS offers proven security apps and functions such as automatic updates, group policies, and Active Directory integration. And ClearOS has already delivered patches to overcome the Spectre and Meltdown issues. Running Windows Server with Microsoft Hyper-V on HPE ProLiant allows you to take advantage of Microsoft’s IT innovations while reducing security risks and disruptions. And VMware vSphere provides multiple built-in security features that help safeguard your environment from attack.

• **Simple**—HPE SMB Offers are a one-stop shop and include preconfigured HPE ProLiant ML and DL servers and software, making them easy to deploy. HPE Rapid Setup Software provides a simple, guided process for installation that takes much less time and reduces the chance of errors.

• **Affordable**—Low-cost HPE SMB Offers make hybrid cloud easy to consume. And HPE Subscription offers a worry-free, flexible option that packages best-in-class hardware, software, accessories, and services into a predictable monthly payment.

HPE Pointnext

**HPE Pointnext** has the expertise and experience to help you simplify operations and easily extend your IT staff, helping them do more with less. Services from HPE Pointnext help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements, to operational support services—keeps your environment running efficiently and reliably.

Choose your best option

With your choice of HPE ProLiant tower or rack servers validated with industry-leading hypervisors, you can enable your virtualization aspirations, with options that support one to sixteen VMs. Contact HPE or your authorized Channel Partner to find out more, today.
