

HPE DATACENTER CARE FOR MULTIVENDOR

Integrate your technology across your IT

THE CHALLENGE

Managing a multivendor IT environment creates increased complexity. In addition, people and process issues can also affect IT—A management tool not set up or fully exploited, difficulty in resolving complex incidents, changing management processes, firmware and software revisions not current or compatible, untested changes put into production are just a few examples. Day to day routine tasks can consume too much time and slowing down taking your staff's focus away from business priorities.

WHY HPE DATACENTER CARE FOR MULTIVENDOR?

As part of modernization, our experts will help your IT manage across technologies and platforms. Have one place to call and one team to work with for all of your IT, both on-premises and cloud. We can help manage and eliminate interoperability issues and standardize processes—easily integrate multiple vendor technologies, operating systems, and business applications and take advantage of strategic partnerships to have a smooth and stable IT that is at peak performance.

A simplified experience

One partner for all your IT operational needs giving you direct access to technical expertise for multiple vendor technologies, operating systems, and platforms.

Direct, fast access to expertise

Assigned support team, both local and remote, for your entire IT environment. Receive you best practice and operational advice that is relevant to your specific IT. Access to the HPE Multivendor Center of Expertise for questions and resolution of issues.

Tailored to specific needs for increased reliability and stability

Access a flexible suite of proactive services dependent on your needs. Choose the level of support that you need to help get problems resolved quickly.

Make the right purchase decision.
