

The Total Economic Impact™ Of HPE GreenLake Flex Capacity

FORRESTER®

HPE GreenLake Flex Capacity is a scalable IT infrastructure service that provides a consumption-based IT model aligned to capacity usage. Organisations get personalised support to augment their IT teams, freeing up internal resources to focus on more value-added and innovative opportunities. This flexible hybrid IT model provides organisations with the agility to scale and grow fast without the burden of identifying and procuring new infrastructure.

SUMMARY OF BENEFITS

Three-year risk-adjusted

HPE GREENLAKE FLEX CAPACITY by the numbers

Voice of the customer

“HPE GreenLake Flex Capacity provides us with the on-demand capacity and agility that we need. To satisfy and continue to offer our customers a great experience, we need to have the flexibility to make business decisions and the IT infrastructure capacity to help execute.”

Global network data manager, online retail company

“Our IT vision is to be in the cloud. However, with a large data centre, we need the control and security of critical applications and workloads to be on-premises. HPE GreenLake Flex Capacity provides us with the best of both worlds while significantly reducing our costs and improving our IT productivity managing in this model.”

Storage architect, global consulting company
