SIMPLIFY YOUR MOVE TO HYBRID CLOUD

HPE GreenLake Hybrid Cloud, cloud management services for Microsoft Azure Stack, Microsoft Azure, and Amazon Web Services

Accelerate your move to hybrid cloud with cloud-native, managed services for Microsoft Azure, and so for Amazon Web Services (AWS) and Microsoft Azure StackTM. HPE GreenLake Hybrid Cloud delivers expertise and automated toolsets that help get you up and running faster, keep your costs under control, and protect your business with remote monitoring and support. That's cloud, simplified.

A COMPLETE CLOUD SOLUTION—FROM INITIAL DESIGN TO ONGOING OPERATIONS

Your cloud infrastructure can include services from Microsoft Azure, Microsoft Azure Stack, and/or AWS, selected to meet your precise needs. Using a highly automated “infrastructure-as-code” approach from Hewlett Packard Enterprise Company, and advisory and professional services from HPE Pointnext Services, you can benefit from advanced cost control, automated compliance monitoring, optimized security, governance, and operational scale of your cloud.

Organizations leverage almost 5 clouds on average

– RightScale 2019 State of the Cloud Report, RightScale from Flexera, 2019

GET THERE FASTER WITH AUTOMATED TOOLS AND CLOUD EXPERTISE

Hybrid cloud design methodology
Addresses security, operations, automation, resource management, cost control, compliance, and testing.

Continuous Compliance services
A source of verifiable information across GRC (governance, risk, and compliance)—enabling real-time monitoring and remediation. Automates monitoring of more than 1500 controls, with dashboard access to real-time results.

Continuous Cost Control services
A holistic view of enterprise financials as you migrate to and operate in the cloud. Gain visibility across all your accounts and costs, and use monitoring and alerting features to analyze cost optimization and see potential savings.

"46% of enterprises with hybrid cloud deployments are contracting out some workloads, and IT systems monitoring and management is the top target for managed services."

HPE POINTNEXT SERVICES

Included in HPE GreenLake Hybrid Cloud are tailored services from HPE Pointnext Services, such as design and deployment, operations, management, and support. By relying on our global team of experts, you can save the hassle and the risk of implementing and managing your hybrid cloud platform and get there faster.

GET THERE FASTER WITH AUTOMATED TOOLS AND CLOUD EXPERTISE

Hybrid cloud design methodology
Addresses security, operations, automation, resource management, cost control, compliance, and testing.

Continuous Compliance services
A single source of verifiable information across GRC (governance, risk, and compliance)—enabling real-time monitoring and remediation. Automates monitoring of more than 1500 controls, with dashboard access to real-time results.

Continuous Cost Control services
A holistic view of enterprise financials as you migrate to and operate in the cloud. Gain visibility across all your accounts and costs, and use monitoring and alerting features to analyze cost optimization and see potential savings.

"46% of enterprises with hybrid cloud deployments are contracting out some workloads, and IT systems monitoring and management is the top target for managed services."

By 2020

By 2020, 46% of IT decision-makers named “assessing the optimal deployment model for workloads” as a top challenge in implementing their hybrid cloud environments

organizations that lack cost optimization processes will average 40% overspend in the public cloud
