**Figure 1.** Continuous Compliance dashboard provides visibility into your compliance readiness

To thrive in today's cloud-focused world, enterprises are turning to an entirely new category of monthly managed services solutions that enable unprecedented visibility and control over service management and IT compliance in the cloud.

Cloud Technology Partners (CTP), a Hewlett Packard Enterprise company, is a premier cloud services and software company for enterprises moving to Amazon Web Services (AWS), Google™, Microsoft®, OpenStack®, and other leading cloud platforms.

CTP's monthly managed service solution for the cloud-enabled enterprise helps you:

- Achieve and maintain a continuous state of compliance readiness
- Build a data-driven approach to compliance
- Analyze and develop a remediation strategy with real-time notifications
- Accelerate the pace of innovation by considering compliance during development, instead of after

### Continuous Compliance paired with CTP's ongoing expertise provides:

- A client success team of cloud GRC architects for remediation, gap analysis, and architecture planning
- Operational control over security tools, so you don't have to
- Ongoing evaluation and updates of key operational and regulatory controls
- Support to accelerate your audit data gathering process, drastically reducing time and costs
- Customized dashboard to enable your executive and operational needs are met
- Operational readiness support for application migration, enabling long-term success

**How does a leader in diversified financial services continuously monitor their applications against PCI and NIST compliance frameworks?**

“CTP’s Managed Cloud Controls are critical for helping us realize our vision on AWS. By ensuring both compliance and cost control across our entire AWS environment, we’re able to achieve the full promise of our investment in AWS.”

– Ann Neidenbach, CIO

Managed Cloud Controls enables a leader in diversified financial services to confidently and near-continuously monitor their application against PCI and NIST compliance frameworks. What’s more, Continuous Compliance addresses the challenges enterprises face when building a cloud program, including:

- Hard-to-find cloud skills
- A holistic view of cloud governance
- Accelerated time to value of investment in cloud
- Improved operational security
- Better, more streamlined decision-making process based on real-time compliance data
- Reduced cost and duration of audits and preparation

### **Start fast, innovate faster**

IT and business leaders understand that meeting regulatory compliance and security obligations is not optional. As applications and workloads move to the cloud as part of a transformational journey, it’s natural to question how your preparation, controls, visibility, and access to data will change. Let CTP help you.
