

Make a backup plan

HPE Small Business Solutions for Hybrid File and Backup

How can hybrid file and backup help you?

- **Protect applications, files, and other data** with on-premises and cloud backup.
- **Simplify business continuity** with automated backups.
- **Keep the team working** at peak efficiency.

Clear skies ahead

When your team is working together seamlessly, the future looks bright. But if you're using PCs, mobile devices, or even an older server to store and share business files, you could be in for some stormy weather. It's not a matter of if one of those devices will crash or get lost or stolen, it's a matter of when.

While it can be challenging for small and midsize businesses (SMBs) to plan for business continuity, it's also absolutely critical. HPE Small Business Solutions for Hybrid File and Backup are ready-to-go solutions that enable you to adopt a simple yet robust business continuity plan.

The solution uses a combination of Azure Files and Azure Backup¹ with an on-premises **HPE ProLiant server**, powered by Intel® Xeon® processors. Microsoft® Azure Backup automatically copies your files both to Azure Files in the cloud, and to the HPE ProLiant server at your office. And data is encrypted at rest and in motion for security and compliance.

You may also choose to leverage Partner colocation cloud services to enable this solution.

With the right mix of on-premises and cloud features, HPE Small Business Solutions for Hybrid File and Backup help you easily adopt hybrid cloud to protect your business against downtime and data loss while also saving you time and money.

Better together

HPE Small Business Solutions for Hybrid File and Backup are:

Secure

- Protect against attacks and quickly recover from unplanned downtime with built-in security features that make HPE ProLiant Gen10 the world's most secure industry-standard servers.²
- Azure protects data at rest and in transit using SMB 3.0 and HTTPS.

¹ Microsoft Azure services can be obtained from a Microsoft Cloud Solution Provider (CSP).
² Based on external firm conducting cybersecurity penetration testing of a range of server products from a range of manufacturers, May 2017.

Solution brief

Simple

- Easy-to-deploy HPE Small Business Solutions are a one-stop shop for preconfigured hardware and software.³
- HPE Rapid Setup Software provides a simple, guided process for installation that takes much less time and reduces the chance of errors.
- Simplify cloud file share management using familiar tools.
- Easily extend your servers to Azure with Sync for on-premises performance and capability, while easily and automatically backing up and restoring files.

³ Depending on the model.

⁴ HPE SMB Offers are regionally released as "Smart Buy Express Offers" in the U.S. and Canada, "Top Value Offers" in Europe, and "Intelligent Buy Offers" in Asia Pacific and Japan.
