### Product End-of-Life Disassembly Instructions

#### Product Category: **Servers**

#### Marketing Name / Model
[List multiple models if applicable.]

- HPE ProLiant DL385 Gen10
- Name / Model #2
- Name / Model #3
- Name / Model #4
- Name / Model #5

#### Purpose:
The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by Directive 2012/19/EU of the European Parliament and of the Council on Waste Electrical and Electronic Equipment (WEEE).

### 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

### 3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. System Board Battery - Locate the battery on the system board. Use a medium flat head screwdriver or fingers to remove the battery and dispose of properly.
2. Megacell Module – Remove the top cover and locate the megacell on the system. Remove the magecell and dispose of properly.
3. Capacitors>2.5 cm - Remove the PSU from the system. With screw driver, remove the screws securing the top cover, locate the capacitors and use a medium flat head screwdriver to remove them and dispose of properly.
