Set up IT in a snap

HPE Small Business Solutions for Small Office Deployment

What are your top IT priorities?
- **Simplicity**: Give me IT solutions that are simple to select, set up, and manage.
- **Security**: Help me protect sensitive business and customer data.
- **Affordability**: Offer me choices at a variety of price points, and help me get solutions faster with flexible financing options.

“The setup and creation of the ... Wi-Fi network was, by far, the simplest that ZK Research Labs has tested. One unique feature of the HPE setup is that the entire process can be done via the mobile application that is available for Android and iOS devices.”

Check IT off your list

When you're setting up or refreshing a new small, remote, or branch office location, there's a lot to think about. Staffing, setting up utilities, picking out furniture, stocking the break room, ordering office supplies—the list goes on and on. Until now, "selecting, sizing, purchasing, deploying, managing, and supporting a server and Wi-Fi network" has been the biggest item on any new office to-do list—increasing timelines and taking attention away from more important decisions. But not anymore.

You want easy? You got it.

With HPE Small Business Solutions for Small Office Deployment, small office IT is a snap. An HPE ProLiant Server and Aruba Networking first, the small office deployment solution is a complete, validated solution that includes compute, networking, and services—eliminating the need to select, validate, configure, and size IT infrastructure from scratch, and also making it easy to set up and manage. Also offered as an HPE Subscription, it’s simple to acquire with a monthly payment option from HPE Financial Services.

These complete solution bundles bring together the performance, management, reliability, and security features of HPE ProLiant Gen10 servers, HPE or Aruba wired and wireless networking with smart management tools, and the peace of mind of HPE Foundation Care. HPE Small Business Solutions for Small Office Deployment come in two configurations that support up to 50 or 100 devices, offered in validated solutions that converge multiple functions, such as virtualization, storage, and backup onto a single server, for a simple, secure, and affordable IT infrastructure.

In short, HPE Small Business Solutions for Small Office Deployment allow you to focus on getting the new office open on schedule—and on budget.

1 Available in select countries.
It’s all about choice

HPE Small Business Solutions for Small Office Deployment come in two configurations, so you can choose the right features at the right price point:

• HPE ProLiant ML30 with HPE OfficeConnect is ideal for single sites of up to 25 employees/50 devices, with the ultimate in simplicity and speed.
• HPE ProLiant DL20 with Aruba Central and Instant Wi-Fi access points is perfect for one or more sites with up to 50 employees/100 devices, with greater flexibility and more feature sets and functionality.

IT priorities

Simplicity

• Packaged solution bundles are right sized for easy ordering.
• Microsoft®-validated configurations mitigate deployment risks.
• HPE Rapid Setup Software makes deployment fast and simple.
• Bundled HPE iLO Advanced improves efficiency and simplifies server management.
• Aruba Central and HPE OfficeConnect simplify network wireless deployment with equipment that’s “set and forget,” and simplify management via app or web interface.
• Support services are included for a single point of purchase, contact, and accountability.

Security

• Protect against attacks and quickly recover from unplanned downtime with built-in security features, such as iLO and the silicon root of trust. These make HPE ProLiant Gen10 the world’s most secure industry-standard servers.¹
• HPE OfficeConnect and Aruba Central and Instant Wi-Fi access points provide network security features including authentication and content filtering.
• Microsoft Windows Server® 2016 innovations reduce security risks and disruptions.
• HPE Secure Encryption may be added as an optional service.

Affordability

• HPE Small Business Solutions are bundled at an affordable price.
• HPE Subscription is a flexible option from HPE Financial Services that packages hardware, software, accessories, and services into a predictable monthly payment.
• Multiple functions can be consolidated onto a single server with improved performance and IT efficiency through virtualization—and consolidation means savings.
• HPE iLO Advanced provides integrated remote console to reduce the costs of travel and unplanned downtime.

HPE Pointnext

HPE Pointnext has the expertise to help you simplify operations and easily extend and educate IT staff, helping them do more with less. A variety of offerings like Foundation Care and Education Services can help you reduce time spent on operational tasks while improving IT reliability letting you focus on your business goals.

HPE Financial Services

You need affordable access to superior tech, but in a way that preserves cash and helps you be more efficient. Simplify your procurement process and only pay as you use the technology, over time, with HPE Financial Services solutions.
