Find a better balance
Keeping up with today’s dynamic workloads can be a challenge—especially for small to midsize businesses.

When on-premises virtualization isn’t enough, HPE Small Business Solutions for Hybrid Virtualization help reduce IT complexity and costs while providing application high availability and enhanced performance. This enables you to consolidate workloads, balance resources, and increase application availability.

Hybrid cloud enhances the benefits of virtualization
HPE Small Business Solutions for Hybrid Virtualization give IT access to resources as needed so they can provide virtual machine (VM) capacity on demand to accommodate unpredictable workload demands. They are built on HPE Small Business Solutions for Virtualization, optimized and validated to run Microsoft® Windows Server® with Microsoft Hyper-V®.

Adding Azure® Virtual Machines and Azure Backup to the on-premises solution creates a more flexible foundation for workload needs, providing the ability to extend VMs into the cloud for greater capacity and protect VMs with a robust, cloud-based business continuity plan.

You can also leverage Partner colocation cloud services for this solution.

1 Microsoft Azure services can be purchased from a Microsoft Cloud Solution Provider (CSP) partners.
Better together

HPE Small Business Solutions for Hybrid Virtualization are:

Secure
- Protect against attacks and quickly recover from unplanned downtime with built-in security features that make HPE ProLiant Gen10 the world’s most secure industry-standard servers. ²
- Microsoft Windows Server with Hyper-V allows you to take advantage of Microsoft’s IT innovations while reducing security risks and disruptions.
- Microsoft Azure automatically protects data at rest and in motion with a combination of Azure Storage Service Encryption and TLS/SSL, along with multiple user-enabled options for advanced protection.

Simple
- HPE Small Business Solutions are a one-stop shop, ³ making them easy to deploy.
- HPE Rapid Setup Software provides a simple, guided process for installation that takes much less time and reduces the chance of errors.
- Microsoft Windows Server is a well-known operating system, so there is a limited learning curve.
- Azure Backup easily and automatically backs up and restores data.

Affordable
- HPE Small Business Solutions make on-premises and hybrid cloud affordable with preferential pricing and low-price options. ⁴
- HPE Financial Services make purchasing easy, with flexible options that allow you to enjoy the benefits of modern IT now.
- HPE Subscription offers a flexible option that packages best-in-class hardware, software, accessories, and services into a predictable monthly payment.

Expect more

HPE and Microsoft help you achieve these important business outcomes:

- **Keep the business running** by increasing application availability with a robust, cloud-enabled business continuity plan.
- **Improve IT efficiency** by consolidating workloads onto fewer servers to reduce costs and complexity. Balance resources with the ability to extend VMs into the cloud to enhance capacity.

HPE Pointnext services

HPE Pointnext ⁵ has the expertise and experience to help you simplify operations and easily extend your IT staff, helping them do more with less. Services from HPE Pointnext help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements, to operational support services—keeps your environment running efficiently and reliably.

It’s all about choice

With your choice of HPE ProLiant tower or rack servers with Windows Server and Hyper-V along with Azure or Partner cloud services, you can tap into more VM resources. Contact your HPE or authorized Channel Partner to find out more.
