Mission-critical redefined
HPE Primera

Extreme resiliency and performance with the agility of the cloud on the world’s most intelligent storage for mission-critical applications.

IT needs intelligence to keep up with modern demands

We know every organization, regardless of industry, size, or age has workloads essential to their business. These mission-critical workloads represent the keys for you to unlock innovation, get ahead, and ultimately disrupt the status quo.

But it’s near impossible for IT to keep up with the demands of both new and existing mission-critical applications because they’re consumed with provisioning, troubleshooting, and supporting infrastructure.

Sacrificing resiliency for agility is no longer acceptable. Now is the time for intelligent storage that manages itself for every mission-critical app of today and tomorrow.

One platform for every mission-critical application

HPE Primera delivers the agility of the cloud and raises the bar on resiliency and performance, so you can enable innovation without compromise. Built upon proven resiliency and powered by HPE InfoSight, HPE Primera delivers instant access to data with storage that sets up in minutes, upgrades transparently, and is delivered as a service. Ensure always fast and always on storage for all mission-critical apps, backed by a 100% Availability Guarantee.
On-demand for instant access to data

HPE Primera delivers an on-demand experience that gives you the agility of the cloud. Deploy, manage, and scale your storage in 93% less time\(^2\) with a platform that sets up in minutes, tunes itself, and upgrades transparently without any hassle.

The HPE Primera OS brings advanced data services with radical simplicity to your mission-critical apps. Unlike traditional storage platforms that are weighed down by a monolithic OS and force forklift upgrades for new features, this services-centric OS is developed to help minimize risk and be transparent to applications. Installs and upgrades are so easy they may be done by only you in minutes for faster access to new innovation.

Additionally, HPE Primera with HPE GreenLake grow with your business needs. Fulfill your IT needs with elastic consumption and scale delivered as a service and pay as you go.

App-aware resiliency for 100% availability guaranteed

HPE Primera delivers app-aware resiliency that sees ahead to prevent disruptions to help ensure zero downtime of mission-critical applications.

The first layer of protection starts with an all-active resilient design center developed to maintain availability while delivering predictable performance at all times. In addition, the intelligent and advanced software protects against silent data corruption providing end-to-end data integrity. HPE Primera facilitates business continuity with automatic site failover, as well as modernizes and extends data protection to the cloud.

Unlike traditional storage that stops here, HPE Primera also uses artificial intelligence (AI) and machine learning (ML), powered by HPE InfoSight, to predict and prevent disruptions across storage, servers, and virtual machines. Over the past decade, HPE InfoSight has analyzed application patterns across 1,250\(^3\) trillion data points, transforming how storage is managed and supported. Thousands of disruptions have been prevented saving our customers over 1.5 million work hours.\(^4\)

This end-to-end app-aware approach for resiliency is why every HPE Primera is backed by a **100% Availability Guarantee**

Predictive acceleration to safely consolidate at scale

Built from the ground up for NVMe and storage class memory, HPE Primera features a unique, massively parallel, multinode, and all-active platform. You achieve limitless parallelization for consolidating traditional and next-generation mission-critical applications with all volumes active on all media, controllers, and host ports at all times. Avoid tuning your storage again with balanced I/O across all physical components for predictable performance and ultra-low latency.

Instead of being unaware if consolidation will impact your mission-critical apps, HPE Primera offers an embedded AI engine that shows you in real-time if there will be any resource contention issues, so you can safely consolidate.

With intelligence and an architectural advantage, HPE Primera helps ensure your traditional and modern applications are fast, even at scale.

Timeless investment that gets better over time

**Timeless Storage for HPE Primera** transforms the storage ownership experience by delivering storage you can depend upon, today and into the future. Say goodbye to the typical complexity or surprises tied to traditional storage such as forklift upgrades and hidden costs. HPE Primera offers all-inclusive licensing, free controller upgrade options, and guarantees data reduction and availability.
