Use this tool to find the best solution to help you overcome your challenges and reach your business goals.

LEARN MORE ABOUT HPE SMALL BUSINESS SOLUTIONS
HPE Small Business Solutions

HPE Small Business Solutions are a one-stop shop for validated, packaged solutions that are let you concentrate on your customers, your business, your focus.

SIMPLE
Customers are my business, not IT
- I expect IT to work
- I need IT to improve my business
- I need IT advice
- I need to keep IT up and running

SECURE
I don't have the luxury of downtime
- I need complete solutions
- I need IT to be rock-solid reliable
- I need protection from cyberthreats
- I need hassle-free technical support

AFFORDABLE
Getting the best return on IT is vital
- I need IT to be fully utilized
- I'll pay the right price for the best
- I want to purchase on my terms
- I prefer to pay only for what I use

Fear no IT

No worries, safe and secure

Wow, this is efficient

If you’re ready, talk to your partner. Or find a partner here.
Keep the business running

Don’t let data loss hold you back.

Minimize downtime with the ability to failover between virtual machines.
View More

Increase application availability with a robust, cloud-enabled business continuity plan.
View More

Store and back up business files on-site
View More

Protect your files with a plan that includes cloud backup
View More

Maintain data availability with automatic replication to the cloud
View More

Get low-cost, scalable storage that provides continuous availability
View More

If you're ready, talk to your partner. Or find a partner here.
Increase IT efficiency

Get the most out of your IT investments.

Consolidate more workloads onto fewer servers

Tap cloud resources to respond quickly to peak demands

Store more data, more securely and affordably

Scale size, performance, and costs on demand

If you're ready, talk to your partner. Or find a partner here.

Microsoft

HPE Small Business Solutions
Built to solve your business problems | Tested and validated | Cloud ready

If you're ready, talk to your partner. Or find a partner here.

**Improve productivity**
Keep IT simple and give employees the tools they need to thrive.

- Get up and running quickly and improving application performance
  - View More

- Provide a central repository for files so employees can collaborate more easily
  - View More

- Keep the team working at peak efficiency, with undisrupted access to files
  - View More
Enhance the customer experience

Provide better service, faster responses, and positive interactions.

If you’re ready, talk to your partner. Or find a partner here.
Avoid storage surprises

Data is one of your business’s most valuable assets. You need to make sure it’s protected and available every day, even in case of disaster.

HPE Small Business Solutions for High Availability Storage help protect your data and recover it quickly in case of disaster with one secure, simple, and affordable solution.
Maintain your momentum

Today, IT is challenged to provide a secure, controlled means of storing and backing up files so employees don’t use “shadow IT” or unauthorized cloud file shares that leave data open to attack—and the business open to liability.

HPE Small Business Solutions for File and Backup

Provide a central repository for files so employees can collaborate more easily.

HPE Small Business Solutions for File and Backup help you keep moving forward at full speed, with a single solution that’s secure, simple, and affordable.
HPE Small Business Solutions for Hybrid File and Backup

Keep the team working at peak efficiency, with undisturbed access to files.

Make a backup plan

Keeping data safe and available is absolutely critical. But lack of financial and IT resources can make it challenging for small and midsize businesses to plan for business continuity.

HPE Small Business Solutions for Hybrid File and Backup with Microsoft Windows Server and Microsoft Azure® or colocated partner cloud services are ready-to-go solutions that enable you to adopt a simple yet robust business continuity plan with the right mix of on-premises and cloud features.

HPE Small Business Solutions for Hybrid File and Backup help you protect your business against downtime and data loss with a secure, simple, and affordable solution.
HPE Small Business Solutions for Virtualization

Run more workloads on a single server for an affordable performance boost.

Do more with less

When you're running a small to midsize business, you've got to make the most of everything. If you haven't virtualized yet, you're leaving both time and money on the table.

HPE Small Business Solutions for Virtualization come with your choice of Microsoft Hyper-V®, or VMware vSphere®. They enable you to run more applications on a single server with better performance and scalability, while lowering costs for hardware, software, and maintenance. Veeam Enterprise Backup & Replication is a recommended option. Veeam provides fast, flexible, and reliable backup and recovery of virtual, physical, and cloud environments from a single management console.

HPE Small Business Solutions for Virtualization help you make the most of your IT investments with a single solution that's secure, simple, and affordable.
HPE Small Business Solutions for Hybrid Virtualization

Consolidate applications onto a single on-premises server and tap cloud capacity on demand.

Keep up with dynamic workloads

Keeping up with modern workload demands can be a challenge—especially for small and midsize businesses with limited IT staff and budget.

HPE Small Business Solutions for Hybrid Virtualization are optimized and validated to run Microsoft Windows Server with Microsoft Hyper-V and Microsoft Azure or colocated partner cloud services. They enhance on-premises virtualization by providing virtual machine (VM) capacity on demand to accommodate unpredictable resource requirements. This enables you to consolidate workloads, balance resources, and increase application availability and performance.

HPE Small Business Solutions for Hybrid Virtualization let you tap into the cloud for higher availability and added capacity with one secure, simple, and affordable solution.

If you’re ready, talk to your partner. Or find a partner here.
HPE Small Business Solution for Small Office Deployment

A complete, validated solution that makes it easy to set up and manage new office IT.

Set up IT in a snap

When you’re setting up a new office, selecting, sizing, purchasing, deploying, managing, and supporting a server and Wi-Fi network is often the biggest item on the to-do list—increasing timelines and taking attention away from more important decisions.

HPE Small Business Solutions for Small Office Deployment give you everything you need to deploy a complete office IT infrastructure in one secure, simple, and affordable solution.
Expand on Demand

In today's digital and connected world, storing vast amounts of data, making it accessible to customers and employees, and maintaining compliance can be a drain on IT efficiency.

HPE Small Business Solutions for Scalable Storage

Handle storage and compliance requirements without breaking a sweat.

HPE Small Business Solutions for Scalable Storage start with an HPE ProLiant server, optimized and validated to run Microsoft Windows Server. You can choose from entry-level or high-performance scalable storage configurations based on HPE MSA storage. Whether you need a low-cost option for file serving and archival storage or high performance scalable storage to speed database performance, HPE has what you need to thrive.

HPE Small Business Solutions for Scalable Storage let you extend storage capacity more quickly and easily with a simple, secure, and affordable solution.
HPE Small Business Solutions for Hybrid Database

Expand and protect your database with greater flexibility.

Flex your database

As the number of applications you rely on to run your business increases, you may find that your database server is straining under the pressure.

HPE Small Business Solutions for Hybrid Database combine an on-premises HPE ProLiant server with Microsoft Azure or colocated partner cloud services. This gives you the ability to access Microsoft SQL Database in the cloud so you can scale as needed to keep pace with application demands. Plus it helps you keep your database available and protected with a robust business continuity plan that backs up data in the cloud and on-premises.

HPE Small Business Solutions for Hybrid Database expand your capabilities while protecting your business against downtime and data loss with a secure, simple, and affordable solution.

HDD: 4 x 2.4 TB 12G 10K SAS  
Controller: HPE P408i-a |

### Notes

- An HA cluster consists of one active server, one passive server, and one server called the "witness node," which decides which server will be the active server in case of a node failure or communication disruption. If you or your service provider are already running a witness node, you can use it in your HPE Small Business Solution for High Availability Storage, avoiding the costs of deploying a third server.

- VMware subscriptions are sold and supported by HPE. Visit the [product page](#) and the [download page](#) for more details.

- Cloud ready: Easily evolve to a Hybrid Cloud solution by adding Microsoft Azure Services.

- Software**: Microsoft Windows Server with Storage Spaces Direct – or – Windows Server with VMware® ESXi®, vSAN™, and vCenter®

- Services: 3-year Foundation Care 24x7
