

HPE Synergy/OneView Integration with Arista Switches

Automated VLAN provisioning on the Arista ToR switches

HPE OneView monitors Arista Leaf ToR switches

- Models Arista switches as part of the Logical Switch resource
- Displays physical switch and port information
 - Switch model, P/N, chassis ID, IP address, SW version, health, etc.
 - Interface info, type, status, speed, LLDP neighbor data and connector info and collects per port statistical information

HPE OneView configures Synergy ICM LIs and compute profile connectivity

- Provisions corresponding VLANs on the Arista ToR downlink ports
- Configures Arista ToR downlinks for MLAG

Delivers core HPE OneView benefits

- Server profiles with connections enable server admin workflows
- Discover and validate Synergy to Arista cabling and connectivity
- Alert on connection errors allowing basic troubleshooting and remediation
