

# ADDITIONAL LICENSE AUTHORIZATIONS

## For HPE USP-M software product

### PRODUCTS AND SUITES COVERED

Products	E-LTU or E-Media available*	Non-production use category
HPE USP-M 4.3	Yes	Production and non-production licenses are available

\* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

### DEFINITIONS

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
E-LTU and E-Media	means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
LTU	means License To Use.
Geo-redundant	means providing geographic redundancy, over 2 or more physical sites, of the software to enable the implementation and configuration to permit site disaster recovery in case of site failure.
Standby	means a resource which is configured but is not being used to provide a function during normal operation, as opposed to an Active resource which is configured and is being used.
Transaction	means the equivalent of 1 message request-response pair.
Transaction Per Second (TPS)	means the number of Transactions in one second.

### SOFTWARE SPECIFIC LICENSE TERMS

Software products with software specific license terms are described below.

#### HPE OpenCall Universal Signaling Platform (USP-M)

The HPE OpenCall Universal Signaling Platform (OC USP-M) 4.3 licenses are based on platform capacity in TPS. The platform could be single server (simplex) or dual server (duplex). Standby (TPS) licenses are needed to enable USP-M platforms at standby site(s) for geo-redundancy. Different licenses are available depending on required capacity. For example:

- HPE USP-M 100 TPS LTU – license for 100 TPS
- HPE USP-M 100 TPS SY LTU – license for corresponding 100 TPS standby
- HPE USP-M Non Commercial LTU – are needed on non-production USP-M platforms planned to be used for test and development purposes only.

The HPE USP-M Consumption offering

HPE USP-M capacity can be purchased in a consumption based model. With this model, the customer will be invoiced quarterly in arrears based on usage. The term license is set to a minimal of 3 months and can be renewed whenever needed. The charging is based on measured consumption in TPS over the quarter. Interfering or disabling any software designed to allow HPE to monitor consumption will be a material breach of this license. After termination of the consumption contract the customer has no further rights to use the OCMP software. A minimum of 100 TPS will be charged at each invoice.

## ADDITIONAL LICENSE TERMS

### Term

---

- A. You shall install and use the software as authorized in the applicable agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the Supporting Material, specifications, or an applicable agreement.
