

Generate the meaningful insights you need to optimize operations

HPE Edgeline IoT Quick Connect enables industrial and manufacturing companies like yours to easily connect your existing equipment; gather, homogenize, and analyze industrial data; and capture the meaningful insights you need to create production line efficiencies. With simple, intuitive tools plus Microsoft® Azure, Edgeline IoT Quick Connect will empower you to quickly and cost-effectively identify opportunities to improve the quality of manufactured goods, minimize defects, optimize equipment performance, streamline processes, and increase profits.

Connect, collect, analyze, and utilize untapped data from the edge

HPE Edgeline IoT Quick Connect is a combination of hardware and software that works together seamlessly to enable simple, fast, and predictable Industrial Internet of Things (IIoT) project implementations. The Edgeline IoT Quick Connect Guide includes all of the instructions you need to quickly and easily to connect industrial devices at the edge and bring the data into the cloud.

*Connect Edgeline IoT Quick Connect easily to any programmable logic controller (PLC), distributed control system (DCS), robotic system, computerized numeric control system (CNC) or other industrial asset to extract real-time data from new or legacy equipment. *No programming required.*

HPE Edgeline IoT Quick Connect

- Quickly connect industrial devices and unlock valuable operational information
- Accelerate your business thru edge insights and intelligence
- Easily connect your devices to the cloud to help drive efficiencies

About HPE

Our reputation for delivering innovative solutions, award winning technologies, global delivery capabilities, and 30+ years' partnership with Microsoft put Hewlett Packard Enterprise in a prime position to lead the way for your Industrial Internet of Things (IIoT) integration and edge to cloud operations.
