THE POWER OF COMPOSABLE AND INTELLIGENCE

Drive a cloud experience on-premises with a foundation of composability on intelligent infrastructure for any workload.

Bringing together the intelligence of HPE Primera with the composability of HPE Synergy, IT organizations have the absolute flexibility to support any application with the agility of the cloud in their on-premises data center—delivered as a service (aaS) to scale to meet ever-changing business needs.

GREATER AGILITY AND FASTER TIME TO MARKET

Automate IT operations to deliver apps and services faster.

Stand up services with a single line of code in minutes.

Gain intelligent insights.

AI-driven intelligence predicts and prevents problems.

Enable self-sufficiency.

HPE InfoSight has analyzed over 1250 trillion data points1.

EXTREME RESILIENCY

Maximize application uptime with end-to-end application-aware approach for mission-critical reliability.

Reduce risk with HPE exclusive silicon root of trust and the Cyber Catalyst designation.

Articulate and prevent disruptions with predictive analytics to reduce outages, disruptions, and wasted time reacting to problems.

SEAMLESS DYNAMIC SCALING

Compose and grow infrastructure on-demand and nondisruptively.

Quickly scale fluid resource pools for bare-metal, virtualized, or container applications.

Extend data protection into the public cloud with HPE GreenLake.

Incrementally scale in real time with auto-integration of resources.

Leverage AI integrations to scale without—

- waiting for a rack, bay, or access to data centers.

Delivered as a service.

Leverage HPE GreenLake delivering pay-as-you-go consumption.

Less time to deploy Oracle databases2

100% data availability guaranteed for always-on applications3

30% CAPEX savings due to eliminated need for overprovisioning with HPE GreenLake
