Helping Businesses Return to Work

A Dramatically Different Workplace Awaits

As many stay-at-home orders begin to expire, you’re confronted with the complexities of returning your employees to work in a manner that’s safe and compliant with any policies inclusive privacy concerns.

A Framework for Safe Return to Work and Mounting Disruption

1. Social Distance Tracking and Tracing
   - Implement contact and manual tracing to provide real-time information with three solutions: Fever detection, location-based alerts, and more.
   - Contact tracing: Determine the contact and proximity history of individual employees.
   - Location tracking: Determine locations of specific employees.
   - Proximity alerting: Alarm if employees are not complying with social-distancing guidelines.
   - Joint offerings with our ecosystem of partners.

2. Touchless Entry
   - Create a secure, low-touch mechanism for identifying and moving body composition.
   - Follow trace-based digital templates.
   - Joint offerings with our ecosystem of partners.

3. Fever Detection
   - Create a simple, low-touch mechanism for employees to verify body temperature.
   - Follow trace-based digital templates.
   - Joint offerings with our ecosystem of partners.

4. Augmented Reality and Visual Remote Guidance
   - Empower employees with remote expert assistance through augmented reality (AR).
   - Implement and manage social-distancing guidelines in physical locations with three solutions:
     - Multifactor access control
     - Identity verification
     - Contactless access
   - Joint offerings with our ecosystem of partners.

5. Workplace Alerts and Information Sharing
   - Create a non-intrusive, low-touch mechanism for detecting and tracing body temperature notifications, and more.
   - Joint offerings with our ecosystem of partners.
