

Earn Continuing Education Credits at HPE Discover Virtual Experience

with the HPE Discover Tech Academies Continuing Education Pass

CompTIA Continuing Education Units (CEUs) options

This year at HPE Discover Virtual Experience, as part of the HPE Discover Tech Academies Continuing Education package, you can earn CompTIA Continuing Education Units (CEUs).

Below are additional HPE Education Services training classes included in the package. Please note these do not attract Continuing Education Credits.

Course Title	Course description	Duration
HPE OneView Quick Start with Hands-On Training	HPE OneView is an integrated converged management platform that automates tasks and streamlines processes. During this two-hour hands-on training session, you will explore HPE OneView, learn about its core features and use the HPE OneView Global Dashboard. You will also receive an architectural overview, helping you understand HPE OneView managed components at a high level.	2 hours
HPE SimpliVity Overview with Hands-On Training	Attend this two-hour session to learn how the HPE SimpliVity system meets the goal of achieving dramatic improvements in data efficiency, availability, complexity and costs with purpose-built data management and storage capabilities. The session will cover standard HPE SimpliVity operations in theory, and attendees will also get hands-on practice. Welcome and experience the award-winning HPE SimpliVity enterprise-grade hyperconverged platform that speeds application performance, improves efficiency and resiliency and restores VMs in seconds.	2 hours
Protecting Data and Utilizing Backup Data is Critical for an Organization's Storage Infrastructure Hands-On Training	Backup data is becoming increasingly important to many organizations in the drive towards data protection and redundancy. Backup software for virtualized environments integrates with HPE Nimble Storage Arrays Volume Collections, allowing you to protect and move your data to a secondary HPE Nimble Storage Hybrid Flash Array for purposes such as DevOps and QA. Discover how this solution works and see how to use Data Protection Software to take snapshots and back up data to HPE Nimble Storage.	2 hours

All classes will be delivered using HPE MyRoom. Please visit <http://www.myroom.hpe.com/download> to download and install HPE MyRoom on your device. Once downloaded, launch HPE MyRoom and enter test room. On opening screen, enter key TYS123. Click "Next." Enter your first and last name. Click "Enter Room." Follow on-screen instructions to configure and test your audio devices and settings. If you need help with HPE MyRoom access visit <http://www.myroom.hpe.com/support>.

Listed below you will see those HPE Education Services classes which attract the credited Units.

Course Title	Course description	Duration	CEUs
Automation Techniques Using Ansible and Terraform: Better Together	Today's automation tools don't have to be competitive, and great things can be achieved when you combine great tools that collaborate to enable solid business and operational outcomes. In this session, learn how Ansible and Terraform can be used together to achieve outcomes of an automated enterprise, enabling complimentary security, image management, post-provisioning configuration and integrated end-to-end automation solutions.	60 mins	1 for A+, or Cloud+
HPE Server Security and Wellness	This session provides an overview of server security, iLO Amplifier Pack, HPE InfoSight for Servers and Cyber Catalyst designation capabilities. There will also be demonstrations of server security features, server discovery through iLO Amplifier Pack, configuration of servers in HPE InfoSight for Servers, how to utilize the HPE InfoSight for Servers wellness and operational dashboards and run wellness reports.	60 mins	1 for A+
Overview of HPE Primera Storage	This session will provide an overview of the HPE Primera portfolio including demonstrations of common day-to-day management tasks including creating the right data-efficient volumes on all-flash HPE Primera arrays and monitoring the system with System Reporter. There will be no hands-on training in this session.	60 mins	1 for A+ or Cloud+
Use HPE Container Platform to Advance Container Management and Accelerate Time-to-Value for AI, ML and Big Data Solutions	HPE Container Platform (built on BlueData EPIC, MapR and Kubernetes) makes it easier, faster and more cost-effective to deploy large-scale AI, ML and big data solutions for on-prem, public cloud and hybrid environments. This session covers how to create, manage and deploy large-scale data analytic solutions in minutes rather than months. We will also demonstrate how to offer a self-service experience for data science teams, making available the most popular big data analytic tools while providing enterprise-grade security and reducing costs.	2 hours	2 for A+, Network+ or Cloud+
HPE Synergy and Composable Overview with Hands-On Training	During this two-hour hands-on training session, you will receive an overview of the HPE Synergy solution and gain key insights into the benefits offered by the HPE Synergy solution to support composable infrastructure. You will also see a detailed presentation of HPE Synergy components, as well as participate in a hands-on training where you can explore the numerous options that new HPE Synergy technologies deliver.	2 hours	2 for A+
Using an HPE StoreOnce System with a Backup Program Hands-On Training	In this hands-on training, you will get a chance to initialize a real HPE StoreOnce appliance, configure VTL, HPE StoreOnce Catalyst and NAS shares and use industry-standard backup programs to write files to the backup devices on the appliance. The HPE StoreOnce product has many additional features and can be a hardware appliance or virtual machine. This session will demonstrate how to get started with the basic functions of HPE StoreOnce version 4.2.	2 hours	2 for A+ or Cloud+
